

SHOW DAILY 3

THURSDAY, FEBRUARY 08

FEBRUARY 06 - 09, 2024, BOMBAY EXHIBITION CENTRE, GOREGAON, MUMBAI

PAMEX 2024: SPECTACULAR SHOWCASE DRAWING ENTHUSIASTS FROM FAR AND WIDE

As many as 6749 visitors attended first day at the show while 12,357 visitors thronged to the exhibition grounds on the second day. Expect more footfalls on the next two days of the show!

PAMEX has emerged as a beacon of innovation and creativity, captivating print enthusiasts and industry professionals alike. With its dazzling array of cutting-edge technologies, artistic displays, and interactive conference, PAMEX has become the premier destination for anyone passionate about the art and science of printing.

Drawing in a diverse crowd from across India, the event serves as a melting pot of ideas, showcasing the latest advancements in 3D printing, digital imaging, and traditional print techniques. From seasoned experts seeking inspiration to curious novices eager to explore the possibilities, PAMEX offers something for everyone.

Day 1 of PAMEX 2024 attracted more than 6749 visitors while Day 2 attracted 12,357 visitors to

the show. Exhibitors are happy with the quality of visitors, who are serious business visitors, looking to upgrade their technologies and equipment. Visitors are drawn to live demos of machines at various stalls and new product launches. More than 750 machines are running live at the show while 150 new products have been launched. Innovation Pavilion is buzzing with activities where futuristic print technologies are being shared by veterans in the industry. Exhibitors offering textile and signage printing are getting good inquiries at the show.

The show floor is alive with buzzing machines, showcasing the innovative applications at the show. Visitors are happy with the variety of technologies displayed at the show, which can help them to diversify and be profitable in the long run.

MACHINES SOLD

Shreeji Corporation confirms orders of eight machines

Shreeji Corporation, a big partner of SAGA, Xerox, Multigraf, EPSON and a broad range of other digital printing & print finishing equipment in India, has confirmed the orders of eight machines during this ongoing PAMEX 2024. "We are really excited about the way PAMEX is organised in such a way that right visitors have come up and immediately take decision to invest in their choices of machines and equipments," says Krunal C Jasani, Director, Shreeji Corporation.

Some of the showstoppers from SAGA and other machines from the brands like Rongda are the key showcases at PAMEX 2024. "We look forward to bigger participation in all future editions of PAMEX as this show gives us the perfect mileage to boost our business and clients base. As I mention the confirmation of eight orders of our machines right on the very first day of the show, we expect more, something near about 50 or so," mentions Krunal, adding that visitors are requested to visit Shreeji Corporation's demo centre at Goregaon after the show.

Visit Shreeji Corporation at Stall D3.

SASG UV Solutions sold Drip Master

At PAMEX, SASG UV Solutions is showcasing Drip Master for various coating applications. The machine is the unique machine for UV spot coating, flood coating, HSL coating, soft touch varnish or hybrid/water based/solvent base and UV base coating. Few features of the machine include zero makeready time, ease of operation, less change overtime and speed upto 10000 sph.

According to Anil Saini, Managing Director, SASG UV Solutions Pvt Ltd, the machine has received very positive response at the show. It has been sold to K Joshi & Co, Pune.

Fujifilm: offering both digital and analogue printing solutions

At PAMEX, Fujifilm launched five new models of Apeos A3 Colour and monochrome multifunction printers and they are getting good inquiries for these machines at the show.

According to Priyatosh Kumar, Head of Division, Graphic Communications & Device Technology, Fujifilm India Pvt Ltd, "I think the response at PAMEX is even bigger than last time and the machines that we have launched are entry-level machines, targeted at SMEs, jobbers, corporates and government offices. At PAMEX, we are seeing representation from metros as well as tier 2 and tier 3 cities," he shares.

"At PAMEX, we hope to engage with more and more customers because this is a platform where we are showcasing our strength and visitors can see the various solutions on offer. We are offering both analogue and digital printing machines, catering to a large segment of customers. We are getting good quality leads at the show," he shares.

On asking about how this financial year has been for them and what are their future plans, Priyatosh replied, "We might surpass the yearly numbers this year. Next year, we plan to launch a plethora of new products, in fact you will see one product launched every month in graphic communications or device technology. We have introduced new products in the digital segment and we will consolidate our presence in this segment."

Monotech Systems shows another level of digital printing & print enhancement

Monotech Systems, a widely acclaimed machine manufacturer and one-stop solution provider for the printing & packaging industry globally, is a showstopper at the ongoing PAMEX 2024 where a complete range of digital printing and print enhancement machines are displayed. Tej Prakash Jain, Managing Director, Monotech Systems Limited, says when it comes to digital production printing the portfolio consists of the new and upgraded RICOH Pro C9500 and RICOH Pro C7500, which are successors of the ever popular RICOH Pro C9200 and RICOH Pro C7500.

Among the key print enhancement systems now showing at the stall of Monotech Systems include Scodix as well as the company's indigenously manufactured PixelGlow and PixelFoil, alongside others. PixelGlow is digital UV and foiling system, reliable on high-speed printing. Likewise, PixelFoil is a cutting-edge digital foiling system for screen printing that provides screen printers the ability to produce stunning foiling effects on wide varieties of substrates. In addition to the newly unpacked RICOH Pro C9500 and RICOH Pro C7500, Monotech Systems' stall also witnesses a newly launched PixelFoil available in 24 and 32-inch sizes. It is designed to offer unparalleled precision, offering a seamless foiling solution for screen printing applications. PixelFoil redefine the foiling process, delivering stunning results with exceptional detail and clarity. Tej Prakash mentions that PAMEX is always a good and interactive platform to introduce new products and connect with their customers as well as industry colleagues.

Apsom Infotex reveals flexibility of Roland technology

Apsom Infotex, a master distributor of Roland DG in India, pulls crowds to its stand where the prowess and flexible technology of a line of Roland technology are showcased. Tony Miller, Executive Officer, Division President, Global Sales & Marketing Division, Roland DG Corporation, Shizuoka-ken, Japan, who visited India for the first time, expressed his excitement about his maiden visit, popularity of Roland in the vibrant Indian market and all excitement at the stall of Apsom Infotex in PAMEX 2024.

"Ever since I joined the Roland DG Headquarters in 2004, I heard about the vibrancy of the Indian market," mentions Tony. He continues, "However, it's quite interesting to see India first hand through our partner Apsom Infotex that has done wonderful job for Roland and we appreciate it. It's great to find multiple market segments, which would be stickers, labels, vinyl, resin, textile, etc are enjoying and exploiting the flexibility of Roland technology to attract new business. Many of our customers in the India get a-ha moments with Roland. After all, my momentous visit to Apsom Infotex is a big thing and fun!"

NBG offers automatic roll-fed square bottom machine

NBG Printographic Machinery Co Pvt Ltd encompasses a wide range of customized & innovative packaging solutions for all market segments to meet the dynamic and ever growing requirements for reliable and technologically advanced converting and printing equipments, in the packaging sphere. At PAMEX, NBG is presenting ZONO's latest innovation ZD-450NB automatic roll-fed flat handle square bottom machine with internal flat handle, a first in India!

This machine is used to make paper shopping bags with flat handles inline (handles folded inside the bag or upright when coming out) fully automatically. The handle making unit makes the flat handles through the roll paper folding, cutting and pasting; afterwards, handles will be delivered to the designated position, and going through the handle pressing unit before they are sent to the bags forming unit. The main machine can form the paper bag in one process from the paper roll, handle patching, side gluing, tube forming & cutting, bottom creasing & gluing and forming to bags collection.

Visit NBG Printographic Machinery at Stall: H06/H10.

BOBST @ PAMEX 2024

BOBST India Ltd is one of the world's leading suppliers of substrate processing, printing and converting equipment and services for the label, flexible packaging, folding carton and corrugated board industries. At PAMEX, the company is not showcasing any product but visitors can meet the company professionals at their stand. The company is highlighting its new technological offerings on Novacut with the Accuregister, a contact-less registration system which is a great feature to increase the productivity and efficiency of the machine and offers 100% zero fault packaging.

Monotech Systems introduces revolutionary PixelFoil screen foiling solution

Monotech Systems unveils its latest innovation, PixelFoil, a screen foiling system integrated with a complete screen printing unit at PAMEX 2024. Designed to revolutionise the world of printing, PixelFoil is available in 24 and 32-inch sizes and combines advanced technology with unparalleled precision, offering a seamless foiling solution for screen printing applications. This cutting-edge system represents a significant leap forward in the industry, providing enhanced efficiency, quality, and versatility. PixelFoil incorporates state-of-the-art features that redefine the foiling process, delivering stunning results with exceptional detail and clarity.

Some key features of PixelFoil include: high-precision foiling capabilities for intricate designs and patterns; seamless integration with existing screen-printing workflows for enhanced efficiency, and so on. "We are thrilled to introduce PixelFoil at PAMEX 2024," said Tejinder Singh, Business Head-PPS, Monotech Systems. "This groundbreaking system represents the culmination of our commitment to innovation and excellence. We believe PixelFoil will empower printing professionals to unlock new creative possibilities and achieve unparalleled results." Visitors to at the Monotech Systems Stall at PAMEX 2024 can have the opportunity to experience PixelFoil firsthand and witness its capabilities in action.

Hohner representative @ Gayathri Machinery

Hohner specialises in the design and manufacture of wire stitching equipment, offering narrow stitching heads, saddle stitchers and wire stitching machines. Hans-Peter Schollhorn of Hohner Maschinenbau GmbH is present at the stand of Gayathri Machinery at PAMEX. "It is an interesting show and India is a big market for us," he says.

On asking about their focus on the Indian market, he replies, "The Indian market is very important for us, especially when it comes to the stitching heads because there are more than 18 OEM in India, who are using Hohner stitching heads. The new system which we will show at drupa will also be good for the Indian market. In Europe, we are already using this line for the educational segment for printing exam papers."

Talking about their plans for drupa, Hohner shares, "We are a member of the Post-Press Alliance Group. There are members like BOGRAMA, H+H, Hohner, MBO and Wohlenberg. At drupa, we will have a joint venture booth with over 1200 square meters. We are also working closely together with MBO and are using their components as an integration in our lines for the digital finishing section. And that's what we want to show at drupa. From the roll-set to single sheet supply and also from a normal folded sheet tool. So we are the only company in the world to offer all five possible feeding systems."

Visit Gayathri Machinery at Stall E01.

Memory launches new Collapsible Box Making Machine

Memory, a third-generation manufacturer of pre-press and post-press equipment, at PAMEX 2024 has announced the introduction of a new Collapsible Box Making Machine. The machine is has new and upgraded features such as double servo motors and cam boxes. "This newly introduced machine is quiet and stable operation circumstance and smooth mechanical process," informs Sanjeev Chadha, Managing Director, Memory Repro Systems Private Limited. Besides the newly introduced Collapsible Box Making Machine, Repro's stall at PAMEX 2024 hosts a line of other flagship products. Some of the key crowd-pulling machines now showing at the stall of Memory include Sheet Separator, Auto-Sizing Box Forming Machine, Hot & Cold Lamination Machine, Gluing Machine, and others. "PAMEX is certainly a good connecting point where we productively bond with our customers and many other industry fellows," mentions Sanjeev.

Indiacot sold three machines at PAMEX

Indiacot is a leading player in the realm of embossed foil transfer machines. At PAMEX, the company is displaying automatic embossed foil transfer machine, digital foiling machine 20x30 inches, Cast And Cure machine.

"Primarily, we offer machines which give more value to prints, with embellishments. And so we have displayed a machine over here, which is a screen printing machine with a complete follow-up as far as cast and cure, as well as it has all the foiling and the varnish options. This is the first time that we are showing this setup over here and till now the results have been very good. We have launched this machine in screen as well as in the digital form. We are also coming up with an individual foiler. This is our first show where we are displaying our make-in-India product," shares Santosh of Indiacot.

"We have been able to close three deals at PAMEX for this complete line with screen printing machine," he adds.

	3.45 - 4.00	Break
Session 17	4.00 - 4.30	Hemanshu Desai, Automation in Pre-press
	4.30 - 4.45	Break
Session 18	4.45 - 5.15	Dr Ashutosh Tripathi, Printed Electronics – From Convergence to Creation

DAY 04

SESSION I

Session 19	11.00 - 11.30	Venkat Janardhan, The Potential of 3D Printing Technology in the Modern World
	11.30 - 11.45	Break
Session 20	11.45 - 12.15	Ashish V Urewar, Indian Printing Standards
	12.15 - 12.30	Break
Session 21	12.30 - 1.00	Dharamraj, AI in Design
	1.00 - 2.30	Lunch

Bhogle Engineering Works sold 2 lamination machines

On display at Bhogle Engineering Works stand are Thermal Lamination Machines, Grooving Machine, Gluing Machine, Corner Pasting and other Packing segment Machines.

As per Yogesh Bhogle of Bhogle Engineering Works, "Since 2000 we are serving printing industry by introducing wide range of proven lamination machines. We have sold two laminating machines at PAMEX and got some good leads at the show. We hope to close many more deals at the show."

Consult SP Konsultancy to elevate your print-pack business

At PAMEX, SP Konsultancy is providing consultancy services to printing and packaging enterprises. "Enhanced by digital printing and AI, personalisation and aesthetic appeal are at the forefront. Simultaneously, environmental sustainability is becoming crucial, pushing for eco-friendly materials and practices. Business owners in this evolving sector must adapt their strategies to embrace these new trends and meet the dual demands of innovation and sustainability," shares Kishor Surti, Principal Consultant, SP Konsultancy. "We got good number of visitors at our stand and we ask them about the current challenges they are facing in the industry and help them how to overcome those challenges."

The company's key verticals are Insight education program, SWOT analysis and implementation, Automated business mastery, Navigator support, Mentorship Alliance and Sustainability.

The company has also recently launched Mudran Vidya for students, empowering tomorrow's leaders in printing and packaging. "It is aimed to bridge the gap between the skills required by the industry and the educational institutes. We have received good response for this as well," shares Kishor.

Visit SP Konsultancy at Stall E05.

Find stylish ID cards @ Bharti Creations

At PAMEX, visitors can see stylish, trendy, and quality ID cards at the stall of Bharti Creations, which is one of the leading ID card manufacturer companies. They offer various products like Blank PVC ID cards, RFID cards, Magnetic Strip cards, Chip cards, Lanyards, Metal ID card holder, and much more at a reasonable cost. Along with this, they are also offering a modified ID card printer, ID card tray for Epson printer, and ID card printing software.

ROLAND 900 Evolution & 900 XL

Bearing all the hallmarks of innovation, productivity and quality that have become synonymous with the Evolution name, the **Roland 900** Evolution large-format press for packaging and commercial printing comes with a wealth of cutting-edge automation technologies to deliver cost and energy savings for printers, along with ever-faster make-ready times.

R900 FEATURES AND BENEFITS

- Better Performance
- Shorter make ready times
- Less energy consumption
- Intuitive Operation on TouchScreens
- Autoprint
- Worldwide benchmark in inking units technology
- Highest quality in coating applications

R900 TECHNICAL SPECIFICATION SPEED

Sheets Per Hour 14,000 sph or 16,500 sph

FORMAT 6B3

Sheet format	Max.	1060 x 1450 mm
Sheet format	Min.	600 x 850 mm
Print format	Max.	1045 x 1440 mm
Print format	Min.	590 x 850 mm
Plate format		1145 x 1460 mm

START OF PRINTING 60 mm

STOCK THICKNESS 0.04 - 1.2 mm

PLINTH

Height 334mm, 667mm or 834 mm

R900 XXL FEATURES AND BENEFITS

- Simultaneous Plate Loading (SPL™) for significant reductions in make-ready time
- Largest perfecting press in the world, capable of 64 A4-page production in a single pass, perfecting at 10,000 sph
- 'One pass' productivity offers dramatically reduced number of wash-up cycles and shorter makeready times
- Semi Automatic Plate Loading (PPL) as standard
- Highly productive large format, from sizes 7, 7B and 7B Plus, to 8 (including perfector)
- Optional solutions including Manroland QuickChange and InLine series technologies

R900 XXL TECHNICAL SPECIFICATION

MAX. SPEED:

Format 7:	13,000 sheets/h Max.
Format 7B:	13,000 sheets/h Max.
Format 7B plus:	13,000 sheets/h Max.
Format 8:	11,000 sheets/h Max. 12,000 sheets/h Max.

SHEET SIZE:

Format 7:	1,120 mm x 1,620 mm
Format 7B:	1,200 mm x 1,620 mm
Format 7B plus:	1,260 mm x 1,620 mm
Format 8:	1,300 mm x 1,870 mm

IMAGE AREA:

Format 7:	1,110 mm x 1,620 mm
Format 7B:	1,190 mm x 1,620 mm
Format 7B plus:	1,250 mm x 1,620 mm
Format 8:	1,290 mm x 1,850 mm

SUBSTRATE THICKNESS RANGE:

	0.1 mm to 0.6 mm
Commercial:	0.04 mm to 0.6 mm
Cardboard:	0.1 mm to 1.2 mm
Universal:	0.04 mm to 1.2 mm

“A logical next step into large format press production.”
