PREVIEW NEWSLETTER # 01

Pamex 2017- another successful show in the offing!

Building on the immense success of 2015, Pamex 2017 portends bigger bang in the upcoming edition, which is scheduled to be held at Bombay Exhibition Centre, Mumbai from December 18-21, 2017.

Organized by All India Federation of Master Printers (AIFMP) in association with Print-Packaging.com (P) Ltd., Pamex 2017 is now only five months away. After the humongous success in 2015, when the show was shifted to Mumbai, Pamex is promising to be bigger and better than ever before.

"With more than 5 months to go, we are already bigger than the last edition. We are striving to get more companies on board and will make all efforts to make Pamex as huge as possible," said Tushar Dhote, Chairman of Pamex.

To that extent, Pamex has a tie-up with Keyin Media, a Chinese company who are the co-organisers of 'All In Print', China. Their expertise in China's Print industry is proving beneficial for Pamex and a China Pavilion in excess of 1000 sqm is expected at the event.

"With the Indian printing industry becoming bigger with every passing year, we have more foreign companies looking to expand their interests in India. Pamex 2017 promises to showcase the very best the printing industry has to offer," said Dhote.

The event is being marketed both abroad and in India. Team Pamex has participated in various Indian and International events such as LabelExpo

India-Noida, Drupa-Dusseldorf, PrintPack India-Noida, Sino Corrugated & Sino Folding Carton- Shanghai & China Print-Beijing, among others.

The promotional campaign kicks off with an International Media Week, being organized in New Delhi in the first week of August. The first of its kind event will see International Media and associations from several Asian and African countries rubbing shoulders with their Indian counterparts in an event that will focus on the developments in the Indian print industry and also provide an opportunity to the exhibitors to announce to the world, new developments and detailed plans for Pamex.

Extensive promotion through road shows is planned and will cover over 50 grassroot towns in Maharashtra, Gujarat, Telangana, Andhra, Kerala, Tamil Nadu, Karnataka and Uttar Pradesh. At the regional level, promotional events are also planned in Pathankot, Lucknow, Indore, Ahmedabad,

Bangalore and Chennai. Pamex will also go international this year with events in Colombo and Dhaka.

"Online visitor registrations are going better than we expected at this stage. In December, I had said we expect a 100%

File photo: PAMEX 15

increase in visitors at the show. It looks like we will surpass that expectation," said a confident Neetu Arora, Director of Print-Packaging.com (P) Ltd.

“PAMEX 2017 will be a digital feast for visitors”

Opines Kamal Chopra, President, AIFMP, in conversation with Team – PAMEX Newsletter.

PAMEX is the flagship event held by the All India Federation of Master Printers (AIFMP) since last 23 years. Here, Kamal Chopra, President, AIFMP, shares his views about the Indian printing industry and the upcoming PAMEX 2017 to be held in Mumbai shortly.

Tell us something about the future of the printing industry in general and Indian printing industry in particular?

Kamal: Print has an unequalled history of strength and believability. It has the power to shape ideas and influence action. It is important to note in today's world of sound bites—of fleeting impressions—of here today, gone tomorrow messages – that print lasts. It is its permanence and consistency – it is its reliability that generates the power of print. No one should ever underestimate this power. Print is more live than any other time in the past, and therefore, the future of print is brighter. Yes the system of printing and style of working is changing, because, with the transformation, our living style is changed. For example, we today have phone in the pocket while 42 years back, it was a distant dream. Infact, many of today's printers might not be knowing about the photo typesetters, Vandyke process, use of process camera, and even imagesetters – these things/processes have vanished with the time, because new and more user friendly processes were innovated.

Printing in India is growing and people are taking keen interest in this key industry now. Advent of TV and Internet has not affected the growth of printing and requirement for printing professionals. The industry has made giant strides in recent times in improving its machinery in terms of the scope, technology and speed. Computers and electronics have invaded all the departments of printing, improving quality and speed of the jobs executed with the consequent enhancement of cost enormously. In fact, the arrival of computers has complemented the printing business and has played a vital role in increasing its status as a clean profession. In India, there are more than 36 printing institutes, some of them giving even post-graduate education. Every year, more than 3,500 new printing engineering graduates join this industry, while many more get on the spot training in the print shops.

The printing industry is one of the fastest growing sectors in India. It is estimated that more than 250,000 printing companies of small, medium and large sizes exist in India, with a capital investment of over USD 2 billion. In India about 85% printing presses are family owned. According to an estimate, the printing industry in India provides direct employment to more than 1.6

million people and indirect employment to over another 1 million. The printing sector in India has developed into a growing multifaceted business. Its leaders in graphic design, print quality and capability are nearly at par with their global counterparts. India's printing infrastructure has changed significantly over

the past decade. Many high end machines have been installed and demand is growing rapidly. Digital and hybrid machines have become popular and are receiving more investment. Most of the leading players have a presence in the Indian print market.

What according to you are the strengths and weaknesses of the Indian printing industry?

Kamal: There is no dearth of talent; Indians are known for crises management and now with more young people than any other country in the world, global industry is looking at India. Strength of Indian printing and packaging industry is again the talented youth and penetration of the industry at the remotest locations of this huge country. The only difference is slow adaptation of 'Change' or transformation. That may be due to capital intensive machinery and non availability of latest print education. Non availability of training/education for the latest innovations and modern systems of printing, may be is the biggest weakness for printing industry of India in my view; other being the non-investment in the research and development activities.

Coming to PAMEX 2017, what is the total expense of the fair? Are this is sync with your targets?

Kamal: The exhibition, which was only in Hall 1 at PAMEX'15 will also expand into Hall 5. The growth target of fifty percent over the last year seems well to be on course to be achieved. A larger contingent of Chinese companies than that has ever exhibited in an Indian event is expected.

What new can the exhibitors/visitors expect at the fair?

Kamal: There will be a digital feast in store for the visitors with most of the major players active in the India having already signed up. The leading brands of offset presses are all on board. While, the exhibitors are yet to reveal their plans of what they will be showing, a very large focus on post press and packaging is foregone. Expect to see a range of rigid box making machines, hard bound galley making and folding & pasting machines.

How many visitors are you expecting at the show and from which areas?

Kamal: We have planned an extensive visitor promotional campaign that includes more than 50 road shows at three levels. At the grassroot levels, we expect to extensively cover the B and C category towns in the states of Maharashtra, Gujarat, Telangana, Andhra Pradesh, Tamil Nadu, Kerala, Karnataka and Uttar Pradesh. At the regional level, we expect to have Road shows in larger towns like Ahmadabad, Bangalore, Chennai, Indore, Lucknow and Amritsar. International destinations will include Colombo and Dhaka. We would expect visitors from all over India and the neighbouring countries. The target is to double the footfall over the last edition.

What other efforts are taken by the organisers to make it a best-in-class show?

Kamal: Our aim is to make PAMEX truly an international event, with the support of 250,000 printers, I do feel it is possible. It is for the first time ever that we are organizing International Media Week at New Delhi from August 3 to 6, where print leaders and media concerning printing and packaging industry is invited from more than 14 countries to share their views about the status of printing in their country and to know the capacity and capability of Indian printing industry. Local printers and printing and allied machinery manufacturers will be rubbing shoulders with International print leaders to apprise them about the Excellency of India in machinery manufacturing as well as in printing. International Media Week is not only important for the overseas promotion of PAMEX but, it may pave a way to convert India as the hub for export of printing and allied services.

Any message for our readers....

Kamal: The print and media industry is changing; with the inception of internet traditional printing started declining. But, at the same time, new technologies in printing are establishing themselves. Packaging, functional printing, printed electronics, web to print, 3D printing and green printing are opening up new sectors for the printers. The concept of printing in the enterprise has undergone a major paradigm shift in the last couple of years. This has created a scenario where printers have evolved much beyond their basic printing function. My only message to the printers of the country is, "Those who resist change, will lose, what they want to keep or those who merely print will be under pressure."

First International Media Week for PAMEX on the anvil

The promotional campaign for PameX will kick off with an International Media Week, which is being organized in New Delhi from August 3-6, 2017. With media and industry associations from both home & abroad, the first-of-its-kind event will open the Indian printing industry to the world.

"Such a gathering of International media, opinion makers & associations-both Indian and foreign hasn't happened in India before. By organizing this meet, AIFMP hopes to showcase the strength of our industry to the world and make PAMEX the premier printing show in the country," said Kamal Chopra, President of All India Federation of Master Printers-organizers of International Media Week and PAMEX.

Associations Meet

Continuing the trend of firsts, the "Week" will start with AIFMP hosting the Associations Meet. More than 12 associations across India will participate in the meet, which will include

Associations of Corrugated Box Manufacturers, Ink Manufacturers, Paper Manufacturers among others. The aim of this meet is to provide a platform to brainstorm on common issues affecting the industry and to evolve a joint strategy to approach the relevant authorities for resolution of issues as well as discussions

on how to grow the industry further. The meeting will conclude with a networking dinner where media representatives and opinion makers from both India and abroad will join.

Media Conference

Day 2 will host the Media conference where presentations from thought

leaders will focus on the latest trends and the size of the Indian printing industry. A presentation on PAMEX and its contribution to the industry will be followed by exhibitors of PAMEX presenting their products and plans for the show. In the evening, the delegates will meet for a networking dinner which will further provide a platform for discussions to continue.

A Visit to PackPlus

On August 5, the guests will visit PackPlus- The Total Packaging, Processing and Supply Chain event. Organized by Print-Packaging.com (P) Ltd., the exhibition will showcase the latest machines and solutions pertaining to Packaging, Carton Making and Package Printing Industries. A factory visit to a leading printing press will follow where

delegates will get a first-hand experience on how the technologies are adapted to work in the Indian printing industry. A dinner at an iconic Indian restaurant will round up the day.

A Visit to the Iconic Taj Mahal

What trip to India can be completed without a visit to one of the Seven Wonders of the World? On the last day of the "week", the guests will partake in a trip to Agra to visit the Taj Mahal. The day long journey will cement the friendships fostered over the previous days and will give the guests a lasting image to take back from India.

PameX 2017 will be held from December 18-21, 2017 at Bombay Exhibition Centre, Goregaon. For more information please visit www.pamex.in or send an email to info@print-packaging.com

A large China Pavilion at PameX!

Building on the immense success of the 2015 edition, PameX is truly going global. This year, PameX will host a China Pavilion- the largest of its kind the industry has ever seen.

For this, PameX has tied up with Beijing Keyin Media Culture Co. Ltd, the co-organizers of "All In Print China." "The partnership with Keyin Media is proving beneficial. They have already signed up more than 500 sqm of the promised 1000 sqm and we expect them to cross all our expectations. China Pavilion is proving to be a huge success," said Tushar Dhote, Chairman of PameX.

Keyin Media is a comprehensive professional media service organization that plays a leading role in China's printing and packaging industry, being extremely popular and influential in the industry. At present, Keyin Media has formed an all-round, multi-level and three dimensional product and service system backed by periodical publishing, book publishing, network service, large-scale activities, convention and exhibition service, consulting, training,

and related industrial service functions. Apart from All In Print China, Keyin Media also organizes China Printing Manager Annual Conference, Digital Printing in China Awards and Digital Printing Summit Forum, Sun Cup Asia Label Awards and Global Label Technology Summit Forum, and China Academic Conference on Printing & Packaging and Media Technology.

What to expect?

One of the major players already on board is Dongguan Guanli. Dongguan Guanli Adhesive Industry Company Limited is a chemical enterprise combined with water based cold glue research, production and marketing. With headquarters at Dongguan City, China, their major products are high speed folder gluer adhesive, automatic box maker adhesive, fully automatic window patching adhesives, etc. They have established their branches at Shanghai, Xiamen, Tainjin, and recently set up office in New Delhi as well.

Another major player is Dongguan Xinhuiyuan Machinery Company Limited. Founded in 2005, they have become one

of the most important box machinery manufacturers in Dongguan, China. They specialize in rigid box making machine and case making machine which have applications in shoe box, gift box, jewelry and cosmetics among other industries. They are exporters to Europe, South Africa, the Middle- East, and various South-East Asian countries.

"All India Federation of Master Printers (AIFMP) is also organizing an International Media Week to increase the scope of promotional activities abroad. With many Chinese industry media & opinion makers attending, we hope to create buzz about the event in China and have more companies participate at the exhibition," said Kamal Chopra, President, AIFMP.

Organised by All India Federation of Master Printers, in association with Print-Packaging.com (P) Ltd., PameX will be held from December 18-21, 2017 at Bombay Exhibition Centre, Goregaon, Mumbai.

For more information please visit www.pamex.in or send an email to info@print-packaging.com

PackPlus'17: GEARING TO BE THE BEST

Building on the previous year's success, PackPlus is back this year, continuing its trend of 30% sustained growth over the past 4 editions.

Featuring more than 375 companies, spread across 6 halls and more than 16000 sqm, the event is expected to receive more than 20,000 unique business visitors.

PackPlus- the total packaging, processing & supply chain event will be held from August 3-6, 2017 at Pragati Maidan, New Delhi. The show has positioned itself as one of the popular exhibitions for the display of latest innovations & developments from the industry.

Packaging Product Pavilion

In 2015, PackPlus had introduced a Finished Packaging Pavilion spread across 300sqm with more than 30 companies. This year, the Pavilion has lost its tag and has grown into 2 Halls with more than 100 companies spread across 1300 sqm. Companies such as Hip Lik Packaging Products, Big Box Inc, Pragati Pack, Any Graphics, P R Packaging Ltd among others will be showcasing solutions in flexible packaging, labels, cartons, tin cans, bulk packaging, blister packaging and other specialised packaging formats.

Primary Packaging Machinery Hall

Spread across 5000 sqm, Hall 11 will house a gamut of running machines from the primary packaging sectors, covering equipment like FFS machines, liquid filling machines, pouch packing machines, multi head weighers showing latest technologies from India & around the globe. Leading companies such as Uflex (Engineering, Holography & Cylinder divisions), Ishida India, Hassia Packaging, Parle Global, SSP Packaging, Shrink Packaging, G -Tech Packaging Solutions, Orpac Systems, etc will be showcasing their latest innovations at the event.

Supply Chain Hall

Hall 12 will house the SupplyPlus event which is a concurrent event with PackPlus. Spread across 1700 sqm, there will be companies such as Signode India, Millennium Packaging Solutions, Vibgyor International, Nilkamal Storage Systems, Bold Gate Resources, VM Technocoating, Alstrut India showcasing solutions in warehouse management, material handling, storage solutions and logistic packaging solutions among other verticals.

Converting Hall

With an area of more than 4500 sqm, Hall 12 A will have solutions covering flexible packaging, converting & printing, rigid box & carton & corrugated box making technologies digital print solutions on display. A range of solutions from pre-press, on press and post press solutions will provide end-to-end solutions for package converters and printers under one roof. Companies such as Uflex, Pelican, BST, Kody, Sudha Converting, Naph Graphics & APL Machinery will be showcasing their products. Large presence of paper cup making machines will be a key highlight at the event and leading manufactures and importers including AKR Machinery, Elegant International, Global Link Impex, Pritul Machines, Swastik Paper Trading Co., Vardhaman Packaging, among others will be showcasing the latest technology. Zhongke India will be showcasing their Rigid Box Machines and

Automatic Paper Bag making Machines at the event.

Conclave

The International Packaging Conclave has now become a much awaited annual event that sees the coming together of converters, suppliers & brand owners as it

focuses on different theme every year. This year it returns with a contemporary and hot theme of Packaging Safety & Compliance. The conclave will be held on 4 August, 2017 at the International Business Lounge in Pragati Maidan. Siegwirk India will be the knowledge partner for the conclave, which will have an interactive case-study based solution format.

"We are getting close to event and all engrossed with the pre-show activities. The invitations are being printed and will be circulated soon. Visitor registrations are ongoing in full swing. We are all set for a record-breaking edition scaling new heights," said Neetu Arora, President, Print-Packaging.com (P) Ltd., the organisers of the show.

Behind the scene...

Print-Packaging.com (P) Ltd. to professionally manage PAMEX '17, Mumbai

Print-Packaging.com (P) Ltd. is the organiser of niche exhibitions in packaging, package printing, converting, automation for packaging and supply chain segment of the industry. Initiating operations as a news and information portal for packaging and printing industry, the company entered into the world of trade exhibitions in the year 2002 with the very first edition of India Label Show. Since then, there was no looking back. India Converting Show and India Flexo Show were also added to the event profile of the company in the year 2003.

Retaining major focus on packaging, Print-Packaging.com on its next step launched India Packaging Show as its annual event. India Converting Show, India Corrugated Show, India Flexo Show, Automation 4 Packaging, India Logistics Show, India Retail

Show and Bulk Pack were the concurrently running events.

In the year 2009, the company brought all these niche events together to announce PackPlus as its flagship event. Covering packaging and allied industries to an extensive level, the event attained huge response from the industry in its very first edition held at New Delhi and created several landmarks with each progressive year.

Reaching another level of accomplishment the very next year, PackPlus launched its Southern edition - PackPlus South which brought Hyderabad on the map of packaging exhibitions. The show was shifted to Bengaluru for an in-depth exploration of the packaging markets in other Southern markets in another successful debut in April this year. It will now alternate between the two Southern cities every year.

After a successful PAMEX'15 in Mumbai, Print-Packaging.com (P) Ltd. is fully geared to manage the upcoming PAMEX 2017 show.

Team Print-Packaging.com

Learn about safe packaging at International Packaging Conclave

The annual International Packaging Conclave will be held on August 4, 2017 at Pragati Maidan, New Delhi.

Organized by Print-Packaging.com (P) Ltd., in association with Siegwark India (P) Ltd, this year's theme for the conclave would be "Safe Packaging- For a better tomorrow."

Scheduled to start post lunch, the keynote session on "Packaging Safety: Need for an integrated support" will be presented by a leading industry expert, while other sessions will include:

Session 1- Product Safety: Risk Assessment of Packaging Material

Chaired by Ashish Pradhan of Siegwark India, the first session (based on an interactive Panel Discussion) will offer a platform to brand owners and regulatory authorities

to share their perspective in the area of packaging safety. The aim is to look at packaging safety in India vis-à-vis the global trends. The session will also outline their expectations from the supply chain partners.

Session 2- Migration and Toxicology: A Threat to Consumer Safety

This session (based on individual presentations) will throw light on the concept of migration; types of migration; factors affecting migration and the impact of migration on product safety. It will also demonstrate the toxicological impact of certain specific components on product safety and the levels at which the impact becomes critical. It will also focus on the analytical requirements required to substantiate migration of components into the products. This session will be chaired by Dr. Joerg Peter Langhammer of Siegwark India.

File photo of 2016 edition of the Packaging Conclave

Session 3- Packaging Compliance: Connecting the Dots

Ensuring packaging compliance is a complex challenge as it necessitates the stakeholders in the supply chain to collaborate and work together to deliver safe packages for products. The session will invite views from different stakeholders in the packaging chain on their role to ensure the compliance of final printed articles. It will further elaborate on the need of collaboration and knowledge sharing among the stakeholders to be able to deliver safe packages. Dr. Evert Delbanco of Siegwark India will take charge of this session. A leading industry expert will summarize the topics discussed during the day and the forum will conclude with a networking dinner.

The conference will be held concurrently with PackPlus'17- the total packaging, processing & supply chain event. With more than 375 exhibitors, spread across 6 Halls, the show will greatly supplement the Conclave.

For more information please call 0120-3075400 or send an email to info@print-packaging.com

What to expect at PackPlus'17?

16,000 sqm of Exhibition Space, 375 Exhibitors, 6 Halls, 1 Destination... PackPlus'17 is the place to be!

PackPlus- the total packaging, processing & supply chain event is round the corner. Mark your calendars, from August 3-6, 2017 at Pragati Maidan, New Delhi...the entire packaging industry will be meeting under one roof.

New product launches

Packplus will witness more than 80 product launches this year. **Uflex Engineering** will offer High Speed Solventless Lamination Machine, High Speed Slitting Machine with Turret System, Pick Fill Seal Machine & High speed Extruded Snacks Packing Machine. **Modtech Machines (P) Ltd** will launch Robotics Case Erector and Case Packer. **Bagla Group** will present High Speed Automatic Shrink Wrapping Machines from Minipack, Italy. **MRL Printing Rolls** of MRL Group will be launching easy changing Rubber roller Sleeves, Anilox Rolls, Design Rollers for various application of Printing, Roto gravure printing, Lamination & Flexo Printing. **Skytech Corporation** will launch Air Cushion Packaging Machine and BANDMA will launch a whole new range of Packaging Solutions.

Apart from the product launches, various exciting machines and solutions would be showcased at the exhibition.

Packaging & Supply Chain

In the Packaging & Supply Chain section, **Hewlett-Packard India Sales (P) Ltd** will showcase innovative & exciting world of applications printed on HP Indigo Digital press for Labels & Packaging segment. **Multivac Laraon India (P) Ltd** will present Packaging Solutions for food products, life science and healthcare products apart from industrial items. **GMP Equipments (P) Ltd, Ahmedabad** will display Viscosfill Liquid Filling & Sealing Machine & Labeling Machine. ACE Products will present its most durable range of Shrink Packaging Machines and other Packaging products. **KGK JET India (P) Ltd Company** will display Inkjet Printer Machine. **Nilkamal Bito Storage Systems (P) Ltd.** will display racking and shelving storage systems.

Converting & CartonTech

In the Converting & CartonTech section, **Global Link Impex** will display high speed Paper Cup Making, Cutting Printing machines. **Speedway Machines (P) Ltd.** will showcase Product Model - TSZ-600 (Standby Zipper Pouch Making Machine). While, **Pelican Rotoflex (P) Ltd** will display advance solutions in Solventless Lamination and Printing. **BST Eltromat India** will present world class systems for Web Processing Industry, 100% Print

Inspection, Web Viewing Video, Register Control & Web Guiding. **Uflex Limited - Cylinder Division** will showcase Specialised Print Cylinders for Flexible Packaging. **NEELKANTH Machinery Company** will display its Fingerless Corrugation Machine. **Vardhman Enterprises** will display Roll Cutting & Creasing Die Machine, Automatic Paper Cup Machine and Slitting Machine. **Rollexe Engineers** will showcase Ball Shaft, Ball Lock, Air Expanding Shafts, Lug Type Shafts, Multi Bladder Shafts, Leaf Shafts, Mechanical Shaft, Safety Chucks & Adapters Series.

Packaging Product Pavilion

The Packaging Product Pavilion which has grown tremendously will be housed in 2 Halls. It is safe to say that it has indeed lost its tag. The "pavilion" will have **Uflex Limited - Holography Division** displaying specialised Anti Counterfeit solutions. **Premium Polymers Ltd** will showcase Induction Sealing Wads & Liners. **Kanpur Plastipack Ltd** will present a range of FIBCs. **Panamax Tapes** will offer complete packaging solutions with Adequate & Effective Adhesive Tapes. **AG Poly Packs (P) Ltd** PET & HDPE bottles with creams jar for cosmetic and pharma companies. **Honeyshield Emballeurs** to showcase the latest in Honeycomb packaging, along with complete packaging solutions.

"With various product launches, running machines and solutions on display, PackPlus' 17 is all set for a record breaking year. See you there!" said Neetu Arora, President, Print-Packaging.com (P) Ltd., the organisers of the show.

SAKATA INX

When
art enhances
a feast for the senses...

Sakata Inx... The tradition of the richest visual expression.

Art is harmony, an orchestra for the senses. And to reproduce it in all its nuances requires the most skillful conductor. Which is exactly what Sakata Inx has been doing for over 100 years across the world. Through its widest range of inks that include the highest international standard food grade gravure inks, flexographic inks, newspaper inks, offset inks, metal decorating inks, water and solvent based overprint varnishes and several additives. And in India, its 100% subsidiary Sakata Inx (India) Ltd. carries on the same tradition.

Its cutting edge technology, complete customer orientation through the best possible service and its focus on environment friendly products have together

delivered to the Indian printing industry the competitive edge at par with international standards. No wonder in the short time of its operation in India, Sakata is a leader in gravure inks and its range of offset inks and other advanced products promise to be so soon.

Always pushing back the horizons of performance and productivity. Determined to improve lifestyles through the more sophisticated visualization of information. Printing inks that usher in a new era of Visual Communication Technology.

PAMEX 2015 created new record with unprecedented sales & deals!

The tenth edition of PAMEX held from December 9-12, 2015 at Bombay Exhibition Centre (BEC), Mumbai saw a record number of deals being finalised at the show. Here are a few glimpses of this successful show.

Successfully and meticulously organised by All India Federation of Master Printers (AIFMP) and Print-Packaging.com (P) Ltd., PAMEX '15 left an impeccable impression in the minds of exhibitors and visitors. While, the exhibitors were happy to meet good number of serious and quality visitors to the show, the visitors were impressed with a plethora of new launches and live demos, which helped them make purchase decisions at the show itself.

The exhibition reported 20,441 unique trade visitors and featured 300+ exhibitors, 200+ running machines and 75+ product launches.

The inauguration...

The show was inaugurated by the chief guest, Uddhav Thackeray, President, Shiv Sena. Sharing his appreciation and pleasure in being invited to flag off the event, being a printer and publisher himself, he said, "It is an honour to inaugurate PAMEX and I thank AIFMP for inviting me. Printing industry is a very big industry and it deserves to get its due recognition." Earlier, the chief guest had arrived to a tumultuous traditional Maharashtrian welcome. Sunil Garg, Honorary General Secretary-AIFMP, welcomed the dignitaries and exhibitors to PAMEX while Tushar Dhote, President, Mumbai Mudrak Sangh and Co-chairman, PAMEX, highlighted how PAMEX 2015 was a step forward for printing shows. Shyamal Chandra Basu, President, AIFMP delivered the presidential address.

Wide display...

It was a digital feast at PAMEX 2015 as all the leading global players were

there with product launches of their latest offerings. Leading the pack was **HP** with its Indigo 10000 Digital Press being displayed for the first time in the country. **Konica Minolta** launched JetVarnish 3DS and bizhubPRESS C1100/C1085. Adding to its popular SureColor series, **EPSON** introduced SureColor SC P9000, which is designed for the most exacting colour proofing applications and many others like in-shop branding.

Xerox presented the capability upgrade of Xerox Versant series 2100 and 80, where the kit can now print banner sizes (330 x 660 mm) in production mode. **Ricoh**, that was also co-partnering the event, displayed the all new Ricoh Pro C9100 series and the C7100x presses even as it also launched its RICOH MP W81405P, an easy-to-use and cost effective MFP, tailored to cater highest level of detailing with high speed and productivity, suitable for engineering and architectural applications like maps and graphs.

EFI CEO, Guy Gecht was present himself to launch the MATAN QW

inkjet printer, with 'white ink' feature, showcased for the first time in the region. **Canon** launched the much-awaited imagePRESS C10000VP.

Among other launches, **Reprographics India** launched the KIP 800 colour series printer. **Newstech**, dealing in products for offset processing and related activities, introduced a set of fountain solutions (Stabilat H-8000 and Unifount), low odour Uniwash, a CFC free solvent-based blanket and roller washes. Fully automated cross strapping machine for magazine and NTPJ-100 paper jogger table for both newspaper and magazine were some of the new launches at the show from Newstech.

Bodhi Professional Solution (P) Ltd launched VeriPak 3D, a complete 3D visualisation tool for graphics professionals in the print, packaging and labeling industry. **AGS** introduced the PDF and print inspection software that is aimed at the packaging market and helps the converters to check their PDF files at the pre-press stage and during actual printing for various errors in the text

as well as colour, thus avoiding a lot of rejections.

Provin Technos launched Foildex, a cold foil and UV cast and cure systems from **Diversified Graphic Machinery (DGM)**. **Proteck Machinery**, distributor of post-press machines from **Horizon**, highlighted the RD 405 a rotary die-cutter and Smart Finishing Solution which has folding, stitching, binding and sheet processing system, to cater to the e-commerce and digital segments respectively.

In the sheetfed offset segment, **Komori's** Enthroner press were running live demos at the **Insight Communication's** stand while **Provin Technos** was promoting the Ryobi presses. **KBA** had its presence at the stand of **Indo Polygraph Machineries (P) Ltd**, while several Indian made presses vied for the visitors' attention.

Various types of Label presses were on offer in the stands of **Standard Printer Providers**, **Provin Technos**, **Genius Flexo**, **Global Graphics**, **RK Label**, **S Kumar** and the Malaysian exhibitor, **Sen Label Machinery**.

Among the several companies offering corrugated box making machinery were **Acme Machinery Company (P) Ltd**, **Acme Machinery India (P) Ltd**, **Associated Engineering Corporation**, **Flexography India Press**, **NBG Printographic Machinery Co (P) Ltd**, **Pack Link Industries**, **Sodhisons Mechanical Works**, **Suba Solutions Private Limited** and **Harbhajan Singh & Co**.

Pratham Technologies, the manufacturer of paper folding machines, displayed its carton sorting system-Supersort. **Beijing Daheng Image Vision Star JP420** carton inspection machine that detects defects in print, foil & emboss registration as well as in lamination at one go, was on display at the **SL Kulkarni's** stand. The machine that was destined for the **TCPL** plant at Silvassa was inaugurated for demonstration by the MD of the company, **Saket Kanoria**. **Autoprint** showcased Checkmate 50, the carton

inspection machine along with **Dion 450 NX**, a four-colour non-woven bag printing machine at their stand in the exhibition. **Line O Matic** Graphic Systems exhibited its latest and upgraded notebook making machines.

Chinese companies @ PAMEX

Chinese companies had a significant presence at PAMEX. While many of them were present with their distributors, over a dozen companies were also participating directly. **Dongguan Hongming Machinery** showcased its line of HM-ZD rigid box making machines which are available in fully automatic and semi automatic versions. **Anco Development** was promoting its automated bending, notching, lipping and straight cut machines. **Zhejiang Ruian Dapen Printing Machinery** displayed its touch screen system paper cutting machines. A leading multi colour offset press manufacturer of China, **Jianxi Zhongjing Group** was testing the waters with an information booth. **Zhejiang Salili Machinery** presented its line of package craft solution and gift box binding machines. **Dongguan Tengfeng Machinery Co Ltd**, was displaying a high quality rigid box making machine. **Haiyan Huada Ink Chemical Co Ltd** had displayed its range of Offset and UV inks and **Shenzhen Mansion Technology Limited** was promoting its range of adhesives and consumables.

Deals finalised...

The highlight of the exhibition was the record number of sales, deals and business happening on the grounds of BEC. To name a few, **Autoprint Machinery Manufacturers Ltd**, **Insight Communications**, **Anil Agencies**, **Pratham Technologies (P) Ltd**, **Stoosa**, **Ample Graphics (P) Ltd** and **Monotech Systems Ltd** closed several deals at the event.

RICOH sold 27 units to customers from all over India. **Canon** received the order of its all new imagePRESS C10000VP and **Oce PlotWave 500** from the Mumbai-based **Bharat Copy Centre (P) Ltd**.

Insight Communications & Print Solution India (P) Ltd sold **Komori Enthroner 429** to **Adinath Print Services**, Mumbai on the first day itself. By the end of the show it had closed orders for six **Komori** presses and three **Kodak CtP** plate setters. **Provin Technos (P) Ltd**, reported orders for three **Ryobi** series presses.

S Kumar Multi Products Pvt Ltd sold **Zonten LRY-330/450** stacked flexographic press to four printers - **Printotech**, **Ludhiana**; **Silvasa Flexible**, **Vapi (Gujarat)**; **Dinsin Labels Pvt Ltd**, **Mumbai**; and **Mamta Graphics**, **Pune**.

The German company **MBO's** subsidiary **Herzog+Heymann** sold **M8.40** outster insert systems to **Hyderabad-based** pharma packaging firm **Temple Packaging** during the show.

Grafica Flextronica closed orders for two cylinder press with inline UV and complete screen making set up, six sets of **Nano Print** with full screen making set up and UV, and nine **Nano Print Plus** with screen making set up at the exhibition.

Kunal Enterprises announced its new partnership with **Toppan Printing**, Japan and showcased its range of products including the **EP-Pak**. **APL Machinery** announced **Vishal Graphics** as its partner for catering to the western market and were seen together promoting their **LED UV** lamps at the show. The most exciting announcement for the industry was the setting up of **Indian JV- Zhongke India (P) Ltd**, by the leading Chinese company and their display of complete range of equipment including two **Case Makers**, **Rigid Box Maker** and a **lamination and grooving machine**.

Conference...

A one-day **International Technology Conference**, organised by **Mumbai Mudrak Sangh (MMS)** was held concurrently with the second day of the exhibition. The event was attended by more than two hundred delegates from the industry.

PAMEX 2017 will be back in Mumbai from December 18-21, 2017. The industry waits in anticipation!

Fujifilm's solutions for labels and packaging

Flenex FW is a high quality, water-washable flexo plate allowing label converters to improve the simplicity and efficiency of flexo plate production. With this, Fujifilm is in an excellent position to offer high quality solutions for sample and prototype making, along with shorter run label and packaging production applications.

Flenex FW is a water-washable flexo plate that provides the highest print quality and productivity, while significantly lowering the cost-in-use compared to thermal, solvent or other water-wash plate technologies. The key benefits of

Flenex FW water-washable plates are:

- Total platemaking time under 40 minutes.
- Highest flexo quality (200lpi, 1% process dot), depending on the conditions.
- More output per shift for class-leading productivity.

SM Ramprasad, AVP – Graphics Arts Division, Fujifilm India, says, “We strive to understand our customer’s business goals, both short and long term, focus on their needs, and then provide the most Fujifilm solutions that will add value to their business. Flenex FW are water-washable plates that answer the call of efficiency. This product not only addresses quality needs of the customer but also facilitates immense resource saving for a converter compared to thermal, solvent, or other water-wash technology.”

Technology overview: Flenex FW photopolymer plates contain a special rubber-based compound that offers a number of inherent advantages over other elastomeric materials

FUJIFILM **FLENEX FW**
Value from Innovation

from which most other flexo plates are made.

Compatibility: Flenex FW plates are compatible with leading Flexo LAM CtP devices such as Screen PlateRite FX, Esko CDI and Xeikon

SM Ramprasad

ThermoflexX Series as well as with the main water wash processors in the industry. Both the analogue and digital versions of Flenex FW can be used with any UV, water-based or solvent-based inks.

High quality print: The Flenex FW water-washable plate system does far more than simply eliminate the need for solvents and wicking cloths. It delivers longer runs while producing a consistent 200lpi at 4,400dpi, 1% process dot structure for superb high quality print, depending on the conditions.

Flat top dot structure: The rubber-based compound means a 1% flat top dot can be achieved without complex systems to eliminate oxygen, and results in lower dot gain.

Higher productivity: Flenex FW water-washable plates reduce platemaking processing times to less than 40 minutes, 300% faster than leading solvent systems and 1.5 times faster than current thermal and water-wash technologies.

Lower cost-in-use: Because of the simplicity of Flenex FW plate processing, the expense of higher-cost solvent and thermal processors as well as upcharges on associated consumables is avoided. The Flenex FW system therefore represents the lowest cost in use for the production of flexo plates.

More durable: Flenex FW is proven to deliver significant improvements in plate durability and reductions in plate swell, thanks to its unique technology.

Less impact on the environment: The processing of Flenex FW plates is accomplished with only a mild detergent. Not working with solvents is a huge benefit from a health and safety perspective.

Konica Minolta launches two new Accurio presses

Further cementing its position in the digital industrial printing segment, Konica Minolta has added two new presses, AccurioPress C2070/2060 to its portfolio of cutting edge printing solutions.

The AccurioPress C2070/ C2060 machine comes as the successor of bizhub PRESS C1070/ C1060 and is an ideal solution to cater to mid-range digital colour printing jobs. The solution has been launched with significant upgrades and refinements as compared to its predecessors and offers complete scalability to meet the growing requirements of printing businesses and enhance productivity.

AccurioPress C2070/ 2060 offers high speed dual scanning at speeds up to 240 ipm for hard-copy originals; 1200 x 1200 DPI resolution with 8-bit processing for smoother, more realistic images; enhanced Simitri HDE toner for superior halftone and skin-tone reproduction, with biomass plant-based material to reduce environmental impact; SEAD V Screen-Enhancing Active Digital Processing System continuously maintains image stability etc.

AccurioPress C2070/ C2060 is equipped with the best in class 300 GSM Auto-Duplex and can also print on media upto 350 GSM. The machine is capable to take media sizes upto 47 inches. Konica Minolta strives to bring all the features of the higher production devices in their entry level machines to enable the same features on the entry production systems. This adds to the flexibility for our customers and equips them with all the features to cater to wide variety of the needs from the customers.

"Our new AccurioPress C2070/C2060 series will enable printing businesses to tap new markets and opportunities with its industry leading applications. The production machines offer print outputs of the highest quality and are extremely scalable for varied customer demands. We are confident that with this launch, Konica Minolta will play a pivotal role in transforming the digital printing segment in India," said Daisuke Mori, MD, Konica Minolta India.

Konica Minolta will now brand each of its digital printing solutions as Accurio in place of bizhub, while AccurioPress will now replace bizhub PRESS for flagship digital production printing devices.

Insight Print Communications to represent Konica Minolta label printing business

Konica Minolta Business Solutions India has appointed Insight Print Communications Pvt Ltd as channel partner to represent its bizhub Press C71cf Label Press in East as well as in West India for the label printing business. Incepted in 1992 in Mumbai, Insight Communications has charted its growth path based on its commitment to customer service and well-being. India's largest dealer for Graphic Arts equipment sales, Insight has played a crucial role to establish some of the biggest global printing brands in India.

Bizhub PRESS C71cf comes as an optimum printing solution for small and medium size businesses in the label and packaging segment to help them explore the endless benefits of digital printing including catering to high volume demands and penetrating new untapped markets.

"We are glad to have Insight Print Communications with us, which with its proven expertise will help us strengthen our commitment of transforming the printing segment in India. Our bizhub Press series has witnessed record deployment in India in recent times and we intend to further fuel this growth. We are expanding into the Industrial Print category with our flagship product AccurioJet KM1, Bizhub Press C71cf and the complete range of MGI Products" said Daisuke Mori, MD, Konica Minolta Business Solutions India.

Line O Matic @ Print 17

At Print 17 (McCormick Place, Chicago, IL USA, September 10-14, 2017), Line O Matic will display BoltRB104 fully automatic exercise book machine. It operates at a speed of 400 metres/minute and converting strokes of 60 cycles/minute to make staple-pin type exercise notebooks from a paper reel. It features shaftless reel unwinding stand, ruling or flexo printing tower, cross cutting unit, sheet overlapping unit, sheet counting and collating unit, one inserter for pre-printed index sheets, one inserter for pre-printed title covers, wire stitching unit, folding unit, square back pressing unit, book front cutting

unit, book separating cutting unit, book flipping & title design mixing delivery table, waste removal system, lubrication system, centralized control panel (PLC).

The machines offers high speed with greater performance, excellent quality output, advanced control system, heavy duty and robust structure, consistency in performance with quality books and low production cost with minimum manpower.

Publisher's Note...

It is a pleasure to present the first Preview Newsletter for the upcoming PAMEX 2017 show to be held from December 18-21, 2017 at Bombay Exhibition Centre, Mumbai. The show is poised to be bigger and better than ever before. The show is already bigger in size than the Pamex'15 and the organisers are striving their best to make it as huge as possible. A major attraction would be the China Pavilion, the largest of its kind the industry has ever seen. Little wonder then that the show will be held in not only Hall 1, but will also spread to Hall 5.

There will be a major focus on digital printers, though there will be an impressive display of offset presses as well. Expect to see many new innovations in post press and packaging categories as well.

The organisers are not leaving any stone unturned to get maximum visitors to the show. An International Media Week will be organised in New Delhi in the first week of August, followed by more than 50 road shows at three levels, extensively covering the B and C category towns in different states. Promotional campaigns would also be organised at international destinations. All in all, Pamex '17 is poised to be the best-in-class show!

- Team - Pamex Newsletters

New responsibilities for Prof Kamal Chopra

Prof Kamal Chopra, President, All India Federation of Master Printers (AIFMP) has been nominated as a member of the 20 member council of Development Council for Pulp, Paper & Allied Industries, headed by Madhukar Mishra, MD, Star Paper Mills Ltd, New Delhi. The council also has representatives from the Department of Industrial Policy and Promotion, IIT Roorkee and Paper & Packaging Industries.

The Government of India, Ministry of Commerce & Industry (Department of Industrial Policy and Promotion) have established a Development Council for Pulp, Paper & Allied Industries vide Gazette Notification No. S.O 1415 (E) dated 4th May 2017 for a period of two years w.e.f. 5th May 2017. The Council meets periodically to discuss issues concerning interests and development of pulp, paper & allied industries.

New XAAR 5501 aqueous printhead introduced

XAAR has introduced XAAR 5501, a new addition to its portfolio of aqueous printheads. This newly added compact and lightweight XAAR 5501 complements the existing XAAR 1201 and XAAR 5601 in the family, and provides OEMs looking for an aqueous printhead from XAAR with a wider choice. This is the first product resulting from XAAR's collaboration with Xerox and delivers high print quality combined with low printing costs whilst integration costs will also be kept to a minimum.

XAAR 5501, which uses proven bulk piezo technology in conjunction with XAAR Drive Electronics, has 5544 nozzles, each producing 5 pl sub-drops giving an impressive 115 mm print width for high quality print. Original Equipment Manufacturers (OEMs) can use this printhead to deliver cost-effective scanning digital printers with a high quality output. This is a lightweight and high resolution 1200 dpi printhead which is ideal for a range of water-based digital printing applications, such as textiles and other graphics (banners, posters, displays). Recognised as one of the industry's most comprehensive finished graphics warranty, the 3M MCS Warranty covers fading, cracking, peeling, and other aspects of outdoor graphic performance for customers using the SC-S40600, SC-S60600, and SC-S80600 printers.

3M introduces new ultra-removable print wrap film

3M has announced the introduction of a new wrap film that makes it nearly impossible to fall out of fashion. This newly unpacked 3M Print Wrap Film IJ180mC-10UR is an ultra-removable print wrap film that comes off quickly and cleanly. Truly the best of both worlds, this innovative film combines 3M's trusted quality and durability with the ability to

remove or replace graphics at a moment's notice. Moreover, IJ180mC-10UR gives installers the freedom to make changes very easily, because it is removed without heat or chemicals. This new film allows graphics professionals to focus on what's most important – letting their imaginations run wild.

EFI enters wood décor market

It was during the recent Ligna, an industrial trade fair on wood carving and designs at Hanover in Germany, EFI announced its new Cubik technology for industrial digital inkjet wood decoration. The newly introduced EFI Cubik technology machine for printing on wood offers both premium quality short-runs as well as high-speed, mass production of decorative surfaces for indoor and outdoor applications on diverse wood media. Based on EFI's single-

pass printing technology, the printer offers the wood industry top-quality decoration, maximum performance and ink saving.

Print entrepreneurs getting trained at BIGC, China

A batch of 7 trainees are being trained in 'Printed Electronics' & '3D Printing' at Beijing Institute of Graphic Communication (BIGC). This is in sync with AIFMP agreement with BIGC to provide print education in '3D printing' and 'Print electronics' to Indian print professionals, students and teachers in printing. The highly subsidised training schedule has been specially fabricated for the members and other print entrepreneurs of the country.

The first batch of training is being conducted from May 22 to August 18, 2017. During a simple but warm send-off ceremony at Hotel Pride Plaza, New Delhi, Prof Kamal Chopra, President, AIFMP

on advance printing technologies relating to '3D Printing' and 'Printed Electronics'. Visit to a range of printing companies using these techniques will also be part of course curriculum.

The next batch of the training is scheduled to commence in the month of

greeted the first batch and persuaded them to return back after enriching their knowledge in 'Printed Electronics' and '3D Printing'. The first batch includes Parag Hase who is teaching printing at Baba Sahib Ambedkar University, Aurangabad and other six are the kith and kin of printers of India.

The course includes lectures, demonstrations and practical workshops

September 2017 and registration is open for the second batch. Prof Chopra further intimated that the total tuition fees for this 3 month training is 10,000 yuan (US \$ 1500, approx. Rs. 1,00,000). The international class hostel facilities are available for the students at BIGC on affordable rates. The details of the course and application form are available at: fopaid11@gmail.com or call 011 26451742

New office bearers for DPA

Rajiv Gupta Rajesh Sardana M Budhiraja

At its Annual General Meeting, Delhi Printers' Association elected the office bearers for the year 2017-2018. Rajiv Gupta from Press Of India is the new President, Rajesh Sardana of Cambridge Press is Hon. General Secretary and Mahinder Budhiraja from Em Kay Printers is the new Treasurer.

First made in India JETSCI inkjet MICR printing solution installed

Monotech Systems Limited (MSL) has installed India's first high speed inkjet MICR printing solution JETSCI-iMCR at one of the top leading security printers in south.

JETSCI-iMCR is the first inkjet solution for MICR printing and cheques personalisation with world's fastest drop on demand technology. It is a customised solution which can be integrated with both offline and online web machines in different configurations, depending on the customers' requirement.

Jimit Mittal, Vice President - Inkjet Products and Solutions, Monotech Systems, says, "JETSCI-iMCR is the result of Monotech Systems' vast experience and regular R&D efforts in the field of inkjet printing. MSL is being the first Indian manufacturing company to introduce state-of-the-art and latest innovative high-speed inkjet printing solution. Development is done as per the market and customer's requirement to provide the highest flexibility, productivity and quality along with the ROI from solutions (multiple solution)."

"JETSCI i-MCR is another innovative solution from our portfolio, which provides security printers to print MICR and cheque personalisation with flexibility and have highest productivity, which in turn can replace multiple setups of the slow/short run printing systems. Along with the flexibility and productivity iMCR gives the quickest ROI to customers with reasonable capex and lowest total cost of ownership," he adds.

JETSCI iMCR is fine tuned to provide high quality at 600 DPI and gives 100 percent of MICR printing signal strength.

Creativity unlimited for FUJIFILM Acuity LED 1600 II

Designed for creativity, FUJIFILM Acuity LED 1600 II is the latest generation in the company's LED UV hybrid family and it is driven by FUJIFILM technology. This new generation UV printer is comparatively faster and more versatile than any other in its class, with simultaneous colour, white and clear ink printing. The system is designed with a new fast printing mode at 33 sq m/hr, which is 50 percent faster than the previous model and it addresses demands

for quicker job turnarounds and lower output cost.

Capable to churn a maximum print width of 1610mm in 1200 dpi, FUJIFILM Acuity LED 1600 II offers simultaneous two-layer printing (white plus clear) and three-layer printing (colour plus white and clear), taking up heat sensitive materials too, and making its capability and creativity unlimited!
