MONDAY, MARCH 27

MARCH 27 - 30, 2023, BOMBAY EXHIBITION CENTRE, GOREGAON, MUMBAI

File photo: PAMEX 2020

PAMEX 2023 - THE SHOW BEGINS!

Featuring more than 450 exhibitors, the exhibition will present a largest gamut of LIVE running machines and innovative products & solutions from the industry!

The premier printing exhibition of the country opens its doors today at Bombay Exhibition Centre, Mumbai. Organised by All India Federation of Master Printers (AIFMP), in association with Print-Packaging.com, the Show will bring the print, label, converting, flexible packaging, corrugation and other allied industries together under one roof.

Themed around 'Convergence in Print,' the Show this year is a plethora of such cutting-edge technologies. Convergence is a phenomenon that has been happening over the past few years. It has gained tremendous momentum in the recent times and is very pronounced today as we come out of the unprecedented global pandemic. At one end, it is driven by the printers who are looking to diversify into an industry segment beyond their primary focus. On the other, the emerging technologies

make it possible for printers to offer newer applications, enhancements and embellishments from their equipment.

The extensive marketing activities, including the well-structured road shows held in different parts of the country over

Konica Minolta focuses on T2, T3, and T4 towns

Promoting Konica Minolta's 150-year legacy, Konica Minolta India recently flagged off its first mobile roadshow platform titled "Print Xpress – Innovations in Print" in the presence of Managing Director, Katsuhisa Asari, Kuldeep Malhotra, Dy. Managing Director & all the senior leadership members. The one-of-a-kind roadshow showcased Konica Minolta's Production Printer AccurioPrint C4065 High Chroma Engine - AccurioPress C73hc and finished Print Application Zone to educate the customers for new business opportunities in the digital print business.

As part of the Print Xpress, the four coaches carrying the digital presses set out to travel in all four directions while demonstrating their usage to potential and existing customers. The roadshow started from Greater Noida and is aimed to cover the nation's T2, T3, and T4 towns like Meerut- Gorakhpur, Samastipur- Tezpur, Ranipet- Karwar and Kavali & many more, focusing on the customers and unmet locations.

HP to showcase HP Indigo 7K and 6K @ PAMEX

At PAMEX 2023, HP will be present at stand G-50, Hall 2, and Stall C-01 in Hall 1, in collaboration with Redington and TechNova, respectively, showcasing two different digital presses for commercial printing solutions and labels. The HP Indigo 7K digital press for general commercial printing applications will be displayed at the Redington stall, while the HP Indigo 6K digital press for labels and packaging printing applications will be highlighted at TechNova stand.

According to an HP spokesperson, it's time that the commercial, labels, and packaging printing industry should discover the future-proof benefits of adopting a digital press. HP's team of experts will be at the show, along with their partners, to guide customers through the process and help them achieve the growth that HP Indigo customers are already experiencing.

The company will also take interested printers from the exhibition ground to the Technova Touch Center physically and through virtual experience, specially designed for the labels and packaging segment in collaboration with TechNova's team of experts.

EXHIBITORS' NEWS

Monotech Systems showcases digital printing and enhancement solutions

Monotech Systems is exhibiting a complete digital eco-system.

The company's key exhibits under the digital printing category include a line of highly advanced RICOH digital production presses, viz. RICOH Pro C9200, RICOH Pro 8300S, RICOH Pro C7200X, and RICOH Pro 5310S.

In the range of their own-manufactured machines, Monotech Systems is demonstrating JETSCI knowzzleJet, which is a highly versatile print-on-demand, high-speed monochrome inkjet web press for applications like books, transactional, direct mail, trans-promotional, security printing, bespoke articles, etc. Further on the front of digital print enhancement, Monotech Systems is showcasing its fully automated PixelGlow digital UV & foiling system. Moreover, a well-laid Scodix print application sample gallery at the company's booth will unveil many possibilities in digital print enhancement.

The screen printers would find something unique in Monotech Systems' booth as the company is launching the digital foiling solution.

Likewise, the company's indigenously made Pixeljet miniRTR UV printer from the company's popular brand 'Pixeljet' Series is a 6 feet LED roll-to-roll UV printer, which is an affordable, effective, is a powerful solution for those looking to migrate from conventional to UV printing, performing live at the booth.

For those looking for a multi-function digital large-format printing system for CAD drawing, poster, and such applications at PAMEX 2023, Monotech System is presenting Canon imagePROGRAF TX-5300, which is designed with advanced technologies for highly accurate CAD & GIS prints.

Visit Monotech Stand B01 Hall 1

Esko software @ PAMEX

Esko is showcasing how its latest software solutions deliver technology that makes it easier for packaging companies to connect its people and processes, to access data, automate operations and to drive operational efficiency. The Esko team is presenting demos and discussions of its latest innovations underlining how they can deliver workflow improvements to boost print productivity, plate room efficiencies and savings on waste.

Murad Kalal, Esko Regional Sales Manager, said, "At Pamex, we are demonstrating our new product offering as part of the Tilia integration, Esko Phoenix. Featuring intelligent algorithms for sheet layout, estimation and planning, this underlines our commitment to delivering integrated software and hardware solutions that accelerate the go-to-market process for packaged goods."

Murad said the team would also detail other automated workflow improvements, such as new multi-MIS support in Esko Automation Engine SaaS and new configuration tools in WebCenter that improve user experience.

Grover Industries to launch next-gen Swiss creasing, perforating and cutting machine

At PAMEX 2023
Chennai-based
Grover Industries

is launching the Multigraf CPCxPro, which is a next-generation Swiss made creasing, perforating, and cutting machine that has been designed to meet the needs of the print finishing industry. The machine is incredibly versatile and can handle a wide range of paper stocks (80-400 gsm) and sizes (375 mm X 1040 mm). This makes it suitable for a wide range of applications, from business cards and brochures to invitations and catalogues. The machine is suitable for both digital and offset printers.

The Multigraf CPCxPro features an intuitive and broad touch screen interface that makes it easy to operate and set up. The machine includes a job memory function that allows operators to store and recall frequently used settings, reducing setup times thereby increasing efficiency.

Visit Grover Industries Stand E03 Hall 1

Nippon Color showcases digital, flexo and label solutions

"Pamex takes place after a few years of gap. We have multiple star products which we will be showcasing at Pamex. For commercial sheet-fed segment, Offset and Digital Printing press users, we are showcasing Digital Embellishment solutions to produce Spot UV Varnish and Foiling digitally without the use of plates or dies. We are partners of Konica Minolta's MGI range of solutions that focus on adding 2D and 3D gloss effects at a reasonable cost without the complicated steps of conventional systems. Accurioshine 3600 will be on display at Konica Minolta's stall in Hall 2 Booth H-22 at PAMEX. Fully digital, featuring industry-leading artificial intelligence registration technology and eco-friendly LED curing system, all at an impressively compact size, the Accurioshine 3600 allows users to offer their customers a full range of high-impact finishing effects, while raising profit margins," tells Akshat Pardiwala, COO, Nippon Color.

"For Flexo printers and plate trade shops, we have an exciting sustainable platemaking solution from Fujifilm. Flenex FW plates are water-wash Flexo plates that provide the highest print quality at the fastest production times, while significantly lowering cost-in-use compared to thermal, solvent or other water-wash technology," adds Akshat.

"For label converters, we have Screen Truepress Jet which is a UV Inkjet label press, and we are also offering an inkjet printing solution. All printed samples are on display at our stand, where we aim to give a hand-holding to our customers during this technology transfer," concludes Akshat.

TAIYO

FUJIFILM India demonstrates both digital & analogue ranges

In its booth of 112 sq m, FUJIFILM India is showcasing its lines of both digital and analogue products. Visitors can witness the company's flagship products in digital high-end production printing segment, such as RevoriaPress PC1120 in live action. The company will also introduce its new offerings in processless CTP plates segment, showcasing its water washable flexo plates for packaging segment.

Apart from the demo of processless plate segment, FUJIFILM India will showcase some new technologies that will be launched shortly for the digital print-on-demand (POD) segment. "My request to the graphic arts fraternity is that please come and visit FUJIFILM India's booth only to observe our commitment towards the industry from both analogue and digital point of view. We strongly believe that both technologies will coexist and complement each other," says Priyatosh Kumar, Head of Division- Graphic Arts, FUJIFILM India Private Limited.

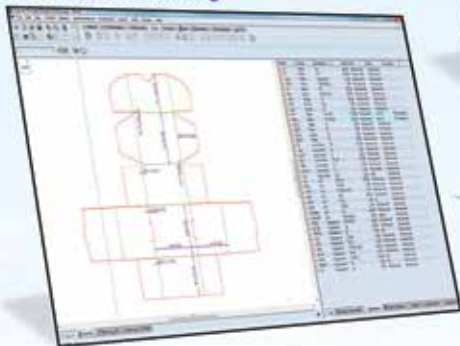

The products and solutions to be on display from FUJIFILM India at PAMEX 2023 effectively cater to both long and short-run demands, including VDP, in the domains of commercial printing, packaging, books and photo printing, offering best quality and cost matrix. Priyatosh emphasises PAMEX as an event that provides a wonderful platform to have more customer conversations as well as an insight into their technologies.

CONVERGENCE IN PRINT!

At Worldstar Global Packaging Awards 2023, 18 Indian companies won the awards. Of these, Black Dog - Black And Gold Reserve Cartons, is an apt example of convergence in print. Here's more.

Black Dog Black And Gold Reserve Cartons

Company : ITC Limited, Diageo India

Category : Beverages

This brand is launched in two variants Triple Gold Reserve and Black Reserve.

This iconic brand has taken leap into more contemporary and premium space, thus reinforcing the brand's success, credibility over years. The revamping has been done by usage of a variety of printing technologies (combination of offset & gravure processes) and various value addition operations like drippoff-gloss texture, multi-colored hot foil stampings, intricate embossing of key elements to represent the brand concept that nature relies on harmonious interaction of its elements. This pack goes through a unique manufacturing process - pasting of two folded flaps to prevent the visibility of manufacturing joint and to give the pack a flawless continuity of all panels.

This new packaging is aimed at modernizing the pack and providing consumer an elevated

experience and making it a choice of drink for the next generation of enthusiasts.

In Triple Gold Reserve, the packaging is

developed using virgin board and is printed with lustrous metallic silver ink using gravure technology in order to give a gleaming base effect. Brand Colors are overprinted through UV offset printing technology. In Black reserve variant, as its name implies is given a rich black background with a blend

of mild colors printed using offset technology. Gloss and drip-off effect has been used intelligently in strategic places to give the pack a premium finish and to enhance the branding. Multi colored Foils (copper & blue) are stamped to reproduce intricate text and Embossing finish adds further enhancement to the Brand. Altogether this package with significant shelf visibility of the iconic Black Dog Roundel has been sculpted in such a manner that each element in the pack have its significance, without comprising the visual appeal of one brand element to another.

Explore opportunities for short-run labels and packaging @ Arrow Digital

Arrow Digital will showcase digital printing technologies for label and packaging industry at PAMEX. The company will showcase ArrowJet 330R Hybrid Pro, which is an all in one priming, printing and varnish machine for glossy durable labels, with a speed of 150 ft./min.

Also on display will be ArrowEZCUT 330R roll to roll multi blade digital label die-cutter and EFI Pro 16h LED with CMYK plus two white channels. The EFI Pro 16h LED UV hybrid inkjet printer has been strategically designed with a complete stimulus package of features to assure the lowest total cost of ownership, superior image quality, and access to the widest range of substrates/applications. The EFI machine can print up to 976 ft²/hr (90.7 m²/hr), with a resolution up to 1200 x 1200 dpi.
